## Additional Facility Information, T779A

T779A was an approximately 1400 square foot, corrugated metal-skinned trailer. The facility was constructed 1984 as an office trailer. 5'x8' wooden decks and steps were attached to the facility, leading to the east and west doors, on the south side of the trailer.

The only utility connected to this facility was electric service, provided by a drop-down line that ran north to south between buildings B705 and B706. This line was disconnected prior to commencement of building demolition activities.
